SHANOOP T K

Linux System Administrator | DevOps & Automation (Ansible, Docker, CI/CD) | RHCSA Certified

07025784372 | shanoopthikkodi@gmail.com | Kozhikode, Kerala | linkedin.com/in/shanoop-t-k-61b0183a9/

PROFESSIONAL SUMMARY

RHCSA-certified Linux System Administrator with hands-on experience installing, configuring, upgrading and troubleshooting Linux servers, and supporting web application servers (Nginx, Apache, Plesk) secured with TLS/SSL. Proficient in Bash scripting, Ansible for configuration management and server administration, Docker and Podman containers (Dockerfiles, image builds), Git and GitHub Actions CI/CD. Solid foundation in networking (TCP/IP, DNS, DHCP, firewalls, AWS Security Groups) and Windows Server (Active Directory), with experience in routine patching, system maintenance and issue resolution in a government/defense IT environment. Built and runs a live startup project on AWS EC2 (shanoop.in): a containerised Next.js website on Podman behind Plesk/nginx with HTTPS and an automated CI/CD pipeline. Clear written and verbal communicator with experience coordinating with development, infrastructure and stakeholder teams to keep systems secure and available.

CORE TECHNICAL SKILLS

- Linux Administration: Linux servers (RHEL 9), installation, configuration, software upgrades, deployment, troubleshooting, SELinux, systemd, user and permission management
- Automation & Scripting: Ansible (configuration management, deployment, server administration), Bash scripting, Git
- Containers & CI/CD: Docker (Dockerfiles, multi-stage builds), Podman, GitHub Actions, GitHub Container Registry
- Security & Web Servers: Nginx, Apache, Plesk, cPanel/WHM, AlmaLinux, reverse proxy, TLS/SSL (Let's Encrypt), firewall configuration, SELinux, patching and system updates, PHP configuration
- Networking: TCP/IP, DNS (forwarders), DHCP, LAN/WAN troubleshooting, firewalls, AWS Security Groups, Windows Firewall rules
- Cloud & Directory Services: AWS EC2, Google Cloud (Compute), Google Workspace, Microsoft 365, Windows Server 2022, Active Directory (AD DC, Organizational Units), AD Certificate Services (Enterprise Root CA, certificate templates), PowerShell
- Applications & Support: Magento, WordPress (site and MariaDB migration), Next.js deployment, email and domain migration, issue documentation, cross-team and vendor coordination

CERTIFICATIONS

- Red Hat Certified System Administrator (RHCSA) — Red Hat | Issued September 2026 · Expires September 2029 · Credential ID 260-112-974

PROJECTS

Startup Project — Next.js on AWS EC2 with Podman, Plesk/nginx & CI/CD | Live on shanoop.in

Website: shanoop.in | GitHub: github.com/shanoopthikkodi19/nextjs-app

- Provisioned and administered an AWS EC2 Linux server and deployed a containerised Next.js website (multi-stage Dockerfile) using Podman, with automatic restart on boot via systemd.
- Built a GitHub Actions CI/CD pipeline that builds the image on every push to main and publishes it to GitHub Container Registry (GHCR), keeping builds off the low-memory production server.
- Installed Plesk and configured an nginx reverse proxy with the container bound to localhost only; secured the site with TLS/SSL (Let's Encrypt) and kept certificate validation and renewal working.
- Administered the server: SELinux boolean configuration, AWS Security Group rules (public 80/443, restricted SSH and admin access), firewall, and swap space.
- Diagnosed and fixed production issues, including server freezes from low memory, nginx duplicate-location errors, failed certificate validation and blocked outbound traffic from a misconfigured security group.
- Documented the architecture, deployment steps, update procedure and troubleshooting in a README.

Windows Server Deployment — Active Directory, DNS & DHCP | Client – Sreejith S-8089508728

GitHub: github.com/shanoopthikkodi19/windows-server-deployment

- Deployed and configured a Windows Server 2022 environment with a single Domain Controller managing 4 user accounts across two Organizational Units (Financial-Department and Technical-Department).
- Configured Active Directory, DNS, and DHCP to connect and manage client workstations on a local network.
- Configured the local DNS server to forward unresolved queries to an external DNS server/router (192.168.1.1), enabling client access to the internet.
- Installed and configured Active Directory Certificate Services with PowerShell (Install-WindowsFeature ADCS-Cert-Authority, Install-AdcsCertificationAuthority) as an Enterprise Root CA (LAB-SHANOOP-CA, 2048-bit key, 10-year validity).
- Issued certificates from certificate templates for web servers, OUs and users, enabling secure TLS/SSL communication.
- Implemented firewall rules to control and secure network traffic between departments and client machines.

- Documented the full setup as step-by-step deployment guides, covering AD, DNS (forwarding), DHCP, certificate services, and firewall configuration end to end.

PROFESSIONAL EXPERIENCE

Freelance Cloud & Linux Engineer | Upwork & Direct Clients

2026 – Present | Remote | Upwork profile: upwork.com/freelancers/~017475a4043828b221

- Migrated a business's Microsoft 365 environment (Outlook mailboxes, SharePoint and OneDrive data), along with its email hosting service and domain, to Google Workspace using Google's built-in migration tools.
- Migrated a WordPress website from an AWS AlmaLinux server to a Google Cloud AlmaLinux server running cPanel, including migration of the MariaDB database.
- Delivered a direct client project (outside Upwork) for yellowfintours.in: provisioned and administered an AWS EC2 Linux server, deployed a containerised Next.js website using a multi-stage Dockerfile, and built a GitHub Actions CI/CD pipeline to automate builds and deployments.

Trainee – Red Hat Certified System Administrator (RHCSA) | COSS India

12 June 2026 – 8 July 2026 | cossindia.net

- Completed intensive hands-on RHCSA training at COSS India covering Red Hat Enterprise Linux administration, including user and permission management, systemd, SELinux, networking and software management, in preparation for the RHCSA certification.

Website Manager (IT & Website Support) | Naval Ship Repair Yard

February 2021 – April 2026 | Port Blair, Andaman and Nicobar Islands, India

- Installed, published, and updated website content and configurations, ensuring timely resolution of routine IT and website support requests.
- Diagnosed and resolved content, access, and configuration issues within a government/defense IT environment.
- Coordinated with internal teams and stakeholders to collect, prepare, and publish accurate information, mirroring cross-team support and vendor-coordination workflows.
- Maintained documentation of website updates, issues, and resolutions to support consistency and continuity of operations.
- Performed routine maintenance, monitoring, and troubleshooting to keep systems and published content accurate and available.

Junior Programmer | Kannur University

November 2019 – December 2020 | Kozhikode, Kerala, India

- Developed and supported the Kannur University Certificate Verification & Equivalency Platform (certificates.kannuruniversity.ac.in), a web portal where candidates who complete online courses on other platforms apply for university-recognised equivalent certificates.
- Implemented the candidate workflow on the portal, including instructions, applications and certificate submission, supporting students across India under the national framework that allows learners to take courses of their choice.
- Maintained and troubleshot the live web application, resolving candidate-reported issues and coordinating with university staff to keep the service available.

Programmer (Course Implementation & Portal Support) | Kannur University UGC Department

- Implemented and ran online UGC courses, such as the Faculty Induction Programme, by configuring them on existing software and learning platforms rather than building new systems.
- Set up course structures, participant enrolment and access, and course content, ensuring each programme was ready and accessible to faculty participants.
- Provided technical support to participants and coordinators, resolving access and course-related issues across multiple concurrent programmes.
- Coordinated with department officials and course coordinators to align course delivery with programme requirements, and documented procedures for repeatable setup.

Magento / WordPress Developer | Seamedia E-commerce Solutions

September 2016 – November 2017 | Kozhikode, Kerala, India

- Installed, configured, and maintained Magento and WordPress applications on Linux-based web hosting environments.
- Configured and administered Apache and Nginx web servers, including PHP configuration for production applications.
- Diagnosed and troubleshot website, server, and application-level configuration issues; performed routine software updates and maintenance for stable deployments.
- Built a strong foundation in Linux system administration through daily hands-on work in a live hosting environment.

EDUCATION

Master of Computer Application (MCA)

Calicut University, 2016

Bsc Mathematics

Calicut University, 2013
